

Pre-Approved Roof Colors for Single Family Homes August 2009

To assist Coral Springs homeowners and roofing contractors, the City has prepared a list of clay and cement roofing tiles that comply with the design guidelines of the City. These colors and styles are pre-approved for single-family homes. The roofs of multi-family apartment or condominiums and all commercial buildings must be reviewed for coordination with the overall building design.

The list is not comprehensive of all products available. Other tiles may comply with the guidelines. New tile colors and styles should be submitted to the City for review with the roofing permit.

If a homeowner wishes to use a roof color or style that does not comply with the guidelines, the homeowner may ask for review by the Architectural Review Committee.

Design Guidelines for Roof Colors

Encouraged Solid Colors

1. Browns
2. Grays
3. Terracottas
4. Muted Reds
5. Whites

Discouraged Solid Colors

1. Blues
2. Purples and Lavenders
3. Greens
4. Yellows
5. Bright Oranges
6. Black

Encouraged Blends

1. Similar tones of one color
2. Different colors in the same tone
3. Blends with only the encouraged solid colors

Discouraged Blends

1. Slurred or flashed tiles with black or deep grays stripes
2. Antiquing with marks and smears in black or deep grays
3. Very high contrasting tiles or flashing colors
4. Mixed finishes
5. Blends including the discouraged solid colors

Notes on Installation

1. Blends should be evenly distributed
2. Ridge caps should be a single color
3. Ridge cap grout should match the ridge cap in color

Exceptions to the Discouraged Blends

As needed, the ARC will review the new catalogues and blends by roofing suppliers. The ARC may recommend certain tiles that typically might be interpreted as a discourage blend.
